1. Purpose

The purpose of this Policy is to ensure that all employees and associated third parties of the Bishop Chadwick Catholic Education Trust ('the Trust', including all associated schools) understand the requirements set out in the GDPR, Data Protection Act 2018 and other associated legislation in relation to the retention of records created and stored within the Trust.

When applying this policy, consideration should also be given to other legislation which may govern and inform the Trusts decisions regarding the duration in which records are to be retained. Whilst not an exhaustive list, the following are key legislation which the Trust is required to comply with in this regard:

- UK General Data Protection Regulation (UK GDPR)
- Data Protection Act 2018 (DPA)
- Privacy and Electronic Communications Regulations (PECR) 2003
- Freedom of Information Act 2000 (FOIA)
- Section 46 Code of Practice - Records Management
- Keeping Children Safe in Education 2020
- Employment Act 2008

The Trust strives to ensure it delivers fair outcomes for its pupils and staff and shall not knowingly or intentionally breach any applicable law or regulation relevant to the conduct of its activities. The Trust is committed to the highest standards of ethical conduct and integrity and is dedicated to acting in an open and honest manner when dealing with both pupils, parents, governors and employees.

This Policy should be read in conjunction with the wider suite of compliance policies which exist to provide a structure for staff to work within and remain compliant with Data Protection legislation. This Policy does not contain an exhaustive set of requirements. Employees of the Trust should always comply with the guidance within this Policy, the overriding objective of which is to protect Personal Data held by the Trust.

2. Scope

This policy and the Data Retention Schedule (Annex A) specify the retention and disposal requirements that apply to all records held by the Trust, regardless of the form they take i.e. paper, electronic records, audio etc. This includes, but is not limited to education records, letters, emails, recorded telephone calls, attendance notes, financial information (such as statements or invoices), reports, legal documents (such as contracts and deeds), meeting minutes and photographs etc.

3. Risk Appetite

The Bishop Chadwick Catholic Education Trust has no appetite for regulatory breaches or breaches of this policy and related procedures.

4. Compliance

Determining appropriate retention periods

In determining the retention periods, consideration is given to:

- The business purpose and requirements attributed to the record
- The need to comply with any applicable statutory or regulatory retention requirements
- Records of public interest or for historical, scientific or statistical purposes or
- The Trust's need to exercise its legal rights and/or defend against legal claims.

The Trust is required under data protection laws to ensure that records containing personal data are not retained in a form which enables the identification of individuals for any longer than is necessary for the purposes for which the personal data have been collected. The Trust must be able to justify the retention of personal data to the authority responsible for enforcing data protection laws (in the UK, the ICO).

In practice this means the Trust must not retain the personal data contained within pupil, employee, supplier or any other records for any longer than is necessary. The Trust takes a proportionate approach to data retention, balancing the needs of the Trust with the impact of retention on the Data Subjects' privacy.

The Trust also needs to comply with all other aspects of data protection laws in relation to the personal data retained, including ensuring that its retention is fair and lawful and that it is secured by appropriate technical and organisational measures against unauthorised or unlawful processing, and against accidental loss, destruction or damage.

There may be circumstances where the data is no longer needed to fulfil its original stated purpose. Where this is the case, it may be appropriate to delete the record prior to its given retention period. Care must be taken however in first assessing the record, as deletion of personal data which should be retained, could in fact be the subject of a data breach.

In some instances, statutory requirements will dictate a retention period, for example pupil education records must be retained for 25 years from the year of birth, or records regarding salary or pension payments must be retained for current year plus 6 years, where this is the case, the statutory timescale must be adhered to. The Trust Data Retention Schedule (Annex A) details the retention period for all records, which takes into consideration both statutory and organisational retention periods.

Retaining data beyond its retention period

Personal Data may also be retained for a longer period if it is solely for archiving purposes where it is in the public interest, for scientific purposes, historical research purposes or statistical purposes, in accordance with Article 89(1) of the GDPR.

Where a record is subject to a legal claim, audit or investigation, it may be retained for a longer period than that stated in the retention schedule. Where this is the case, details of the reason should be recorded and where the record includes personal data, only the specific personal data which is required to be retained to meet the legal claim, audit or investigation should be retained. Records containing this data must be moved from a live environment to a secure archive that is subject to appropriate security and restricted access. Once the record is no longer needed, it is the responsibility of the record owner to ensure it is securely and permanently deleted, disposed of or anonymised. Guidelines for statutory periods for making a legal claim are detailed in the Limitations Act 1980 and should be used as a guide when retaining records for this purpose.

5. Responsibilities: Record Owners

Organisational measures to manage record retention periods

Record owners are responsible for ensuring that all records within their control are retained and disposed of in accordance with this policy and the Data Retention Schedule (Annex A). Measures must be implemented to ensure retention periods are managed in accordance with the retention schedule. Prior to the retention date a review of the record should be carried out to determine whether the record should be destroyed or retained further.

Secure disposal of records

Where there is no requirement to retain the record, the information owner must ensure it is securely and permanently deleted or disposed of in accordance with this policy or where appropriate, that it is anonymised.

Data anonymisation is the process by which personal data is irreversibly altered in such a way that a data subject can no longer be identified directly or indirectly. Personal data must be anonymised if it is to be used for a purpose other than which it was collected (i.e. statistical purposes where the identity of an individual is not required). Anonymisation must be applied to all associated datasets and records, including any back-ups or duplicate copies of the personal data.

Records must be deleted or destroyed securely and in a way that protects the confidentiality and integrity of the Trust and the rights and privacy of the data subjects. Specific care must be taken over the disposal of any Trust confidential, sensitive or confidential personal data. The following secure methods of destruction must be adopted:

- Electronic records should be deleted with a secure deletion utility that ensures the information cannot be retrieved. Standard deletion utilities that only remove the file pointer should not be used.
- Personal data on hard drives, removable media and any similar items must be securely erased before any disposal or reassignment of the equipment.
- Where personal data cannot be erased from equipment, it must be physically destroyed by an authorised, specialist destruction company, and certificates of destruction must be obtained.
- Paper copies must be destroyed using cross-cut shredders or disposed of securely as 'confidential waste' by an approved third party.

6. Training

All employees must undergo GDPR training which outlines their responsibilities under this Policy. Trust employees will undergo this training upon induction into the Trust and undergo refresher training on a regular basis (at least annually). A record of individual training completion must be logged and retained in employee files or a centralised file.

7. Monitoring

Monitoring to assess the adherence to and effectiveness of this policy will be completed by the leadership team in each school and appointed personnel within the central Trust team. Monitoring should be conducted on a regular basis, but no less than once annually to ensure the Data Retention Schedule captures all identified required data.

Recommended Disposal Method

Records must be deleted or disposed of using one of the following secure methods:

Destruction Method: A
<p>Documents retained electronically should be deleted with a secure deletion utility that ensures that the information cannot be retrieved. Standard deletion utilities that only remove the file pointer should not be used.</p> <p>Note: Files that are moved to the recycle bin stay in those folders until the user empties the recycle bin folder. Once files have been deleted from the recycle bin folder, they are still located in the hard drive and can be retrieved with the right software. Secure delete means to overwrite data in a file when the file has been deleted from your computer.</p> <p>A Third Party deletion or shredding tool that fully deletes a file by overwriting it multiple times with random data so the file is virtually impossible to recover is the only way to ensure a file containing sensitive or personal data is definitely deleted for example, Eraser or File Shredder.</p>

Destruction Method: B

Personal Data on hard drives, removable media and any similar items must be securely erased before any disposal or reassignment of the equipment.

For Example: Blancco which offers certified, secure data erasure software for a range of IT assets, including laptops, mobile devices, servers, virtual machines, files and more.

Where Personal Data cannot be erased from equipment, it must be physically destroyed by an authorised, specialist destruction company, and certificates of destruction must be obtained.

Destruction Method: C

Paper copies must be destroyed using cross-cut shredders or disposed of securely as 'confidential waste' by an approved third party.
