

Geography Curriculum Map

KS5

Final Exam Preparation

Preparing for paper 3

Fieldwork skills

Health, human rights and intervention

The carbon cycle and energy security

Challenges for the future

Contested places

Players

super powers and the environment

Global networking

Emerging superpowers

What is a superpower?

Making an impact

Managing supplies

The consequences

Super powers

Deficits

Surpluses

The global hydrological cycle

The water cycle and water insecurity

YEAR 13

Exam Preparation

NEA preparation

Geographical skills

Managing erosion and flooding

Holderness and coastal erosion

Sea level change

Coastal transportation

Waves and beaches

Weathering and mass movement

Coastal flooding

Managing coasts in a holistic way

Natural hazards and disasters

Consequences ethics and sustainability

Rising tensions

Towards a global culture

Switched on and switched off worlds

The key players in globalisation

Understanding globalisation

Globalisation

earthquakes

When do natural hazards become disasters

Hazard profiles

Hazard management

Managing the impact of tectonic hazards

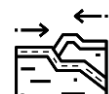

Multiple hazard zones

Governance and natural disasters

tsunami

Plate tectonics

Global interconnections

TNCs and globalisation

Defining globalisation

Coastal landscapes and change

Geology and the coasts

Coastal erosion

Coastal landscapes and systems

YEAR 12

Regenerating places

Thinking about places

Changing places

Successful places

The need for regeneration

Regeneration how successful?

Rural regeneration

The role of the government

Engaging with places

Investigating places

Understanding your place

Regenerating urban places

The players rural

The players urban
